Registration No. S-54001/2005 under Societies Registration Act XXI of 1860 & Income Tax exemption under 12AA(2) of IT Act 1961
Venue: NALCO Auditorium; Bhubaneswar
28 - 29th December 2019

ABOUT THE CONFERENCE
In order to remain competitive in the digital economy, industry and businesses are adopting automation software, robotics, and other new technologies ranging from internet of things (IOT) to artificial intelligence (AI) and machine learning that has become a fixture in headlines that predict the future of practically every industry. Although most workers recognize that technology will disrupt the way they work in their workplaces in the future, few can picture exactly what these changes will look like. Although workers are enthusiastic about the opportunity to master new technology, but they also fear that technology may eliminate their current roles or are worried about their future job opportunities.

High levels of graduate unemployment are a sure sign that this phenomena has already begun. Current and future workers in the labour market must possess skills that are in demand. They must also have an appetite and inclination to learn new skills, to become and stay employable in a meaningful and sustained manner throughout their careers.

This conference is aimed at bringing together engineers, scientists, technologists, IT-experts, students, job-seekers as well as industries, entrepreneurs, business leaders and academia to deliberate on this important issue to build an enduring link between skills development, employability and enterprise development.

ABOUT THE ANNUAL CONVENTION-CUM-AGM OF SEA
Santal Engineers Welfare Association (SEA) is a professional society of engineers, scientists, technologists, IT-experts, entrepreneurs, and academia, registered under the Societies Registration Act XXI of 1860, with about 3000 members from Pan India and abroad. There are ten chapters of the association in Bangalore, Bhubaneswar, Bokaro, Delhi, Hyderabad, Jamshedpur, Kolkata, Mumbai, NALCO Nagar, Angul and Rourkela. The mission and vision of the society is to work towards upliftment of Santals and other tribals and improve living standards through technological interventions, skill development, career counselling, education, mentorship, and preserving the environment. In particular, it aims at developing holistic approaches for instilling sense of power, ability and wisdom without compromising social values integral to tribal society in collaboration with other like-minded organizations working for tribal development.

Every year, an annual convention-cum AGM is held in December to appraise the members of the activities and development work undertaken by the society in the year, and chalk out plans for future activities.

ABOUT BHUBANESWAR

Bhubaneswar is popularly known as temple city and is the capital of the state of Odisha. It is bestowed with magnificent sculptures and architectural heritage, which occupies a significant position in the tourism map of India. Well-connected by air, rail and road to all major Indian cities, this eastern Indian city with a rich history has undergone significant developments to become a major industrial centre and a prominent R&D hub. Bhubaneswar also offers a very rich treasure for the tourist, with the major tourist attractions being the 13th century magnificent Konark Sun temple. The temple has been declared a world heritage site by UNESCO. Jagannath Temple puri, Dhauli/igu Shanti Stupa also known as peace pagoda, Raja-Rani temple, Lingaraj Temple, Mandakanal National Park, Chilika lake, and Puri Beach. More details about tourism opportunities in and around Bhubaneswar can be obtained from www.visitorissa.org. The climate of Bhubaneswar during December is very pleasant, the average maximum and minimum temperature being 18°C and 25°C respectively. The warmth and hospitality of the people are the main attraction in this region.
